

## SDE Task: Frontend in Next.js from Figma

Objective: Implementation of the coupons page based on a Figma design that represents a progressive iteration of our website

### Instructions for developer:

1. Visit the following figma link: <https://savz.live/devnextjsassignment> (Password: spacez.co)
2. Check out the simple coupons page design which is a progressive iteration of the coupons page that is live in the spacez website
3. Recreate the coupons page as per the Figma design in [next.js](https://nextjs.org/).
4. Ensure all **buttons** are interactive and editable/clickable. When clicking on it add a success message to show that as there are no other screens on the design to navigate to.
5. You **do not need to implement actual data saving or backend integration** — this is a frontend-only task showcasing interactivity and attention to UI details.

### Submission Requirements:

- Push your code to a public GitHub repository.
- Make it live with a service like Vercel/Netlify.
- Share the **repository URL** and the live website URL on the following link: <https://savz.live/devnextjsassignmentsubmission>
- The estimated time for completing this assignment is 4–6 hours. We're not looking for polish or perfection — just thoughtful execution, attention to UX, and a sense of completion.
